2	INTEREST OF AMICUS CURIAE.....	1
3	SUMMARY OF ARGUMENT	1
4	ARGUMENT	3
5	I. The challenged law targets a rapidly evolving threat to free and fair elections.....	3
6	A. Deepfakes and deceptive synthetic media pose novel risks in the electoral	
7	context.....	3
8	B. Jurisdictions nationwide have recognized the threat posed by political deepfakes	
9	and similar deceptive media—and, like California, have taken steps to safeguard	
10	their elections.....	8
11	II. The governmental interest in ensuring an informed electorate is well established and	
12	supports tailored regulations of deepfakes and similar deceptive media in elections.....	13
13	A. The Supreme Court has long recognized that laws enabling citizens to cast	
14	informed votes are crucial to a functioning democracy.	14
15	B. The government’s informational interest supports both a ban on fraudulent AI-	
16	generated election ads and disclaimer requirements.....	15

INTEREST OF AMICUS CURIAE

Campaign Legal Center (“CLC”) is a nonpartisan, nonprofit organization working to create a fair, transparent democracy accessible to all voters, including by supporting effective campaign finance and public disclosure laws.¹

CLC submits this amicus brief to address plaintiffs' challenge to AB 2839, Cal. Elec. Code § 20012, et seq.² and to provide a nationwide perspective on state and federal attempts to regulate deceptive synthetic media portrayals of political candidates, election officials, and election processes, as well as an explanation of the important governmental interests these laws advance. CLC has in the past supported versions of the California legislation under challenge in this case.

See Letter re: CLC Support for AB 2839 (Pellerin), Relating to Election (Apr. 4, 2024), <https://campaignlegal.org/sites/default/files/2024-04/CLC%20Letter%20-%20Support%20CA%20AB%202839%20%284.4.24%29.pdf>.

SUMMARY OF ARGUMENT

With the advent of widely available artificial intelligence (“AI”) technology comes a potential revolution in how voters will experience campaign advertising, as well as new threats to the free and fair functioning of our democracy.

AI and equivalent technologies provide political operatives—and now average citizens—with the means to produce low-cost campaign ads featuring digitally generated fake audio and video of candidates that appear “real” yet fraudulently misrepresent what candidates say and do (i.e.,

¹ Pursuant to Rule 7.1 of the Federal Rules of Civil Procedure, amicus curiae states that it does not have a parent corporation, nor does any publicly held corporation own ten percent or more of its stock. Amicus curiae further certifies that no party's counsel authored this brief in whole or in part; no party or party's counsel contributed money that was intended to fund the preparation or submission of this brief; and no person—other than the amicus or its counsel—contributed money that was intended to fund the preparation or submission of this brief.

² CLC does not here address the parallel challenge to AB 2655, *see* Cal. Elec. Code § 20512, et seq., although both Acts advance similar governmental interests.

1 “deepfakes”). As AI technology becomes more sophisticated, even well-informed voters may
2 struggle to distinguish between authentic campaign messages and fraudulent, AI-generated content.
3 This undermines the electorate’s ability to make informed voting decisions—a foundational
4 principle of representative government.
5

6 In response, Congress and legislatures across the country are developing, considering, and
7 enacting laws to address the problems arising from this technology.³ These include bans on the use
8 of digital technologies to create false or fraudulent depictions of candidates and officeholders, as
9 well as requirements for on-ad disclaimers disclosing the use of AI in political messages. More
10 than twenty states have enacted statutes addressing political deepfakes and other deceptive
11 synthetic media portrayals of political candidates or election processes. *See infra* note 20.
12

13 Amicus urges the Court to recognize the need to afford legislatures flexibility to craft
14 responsive and forward-looking policy solutions to address the effects of this rapidly evolving
15 technology on elections. Part I of this submission outlines both the increasing misuse of AI to create
16 fraudulent deepfakes to influence the outcome of elections and the spectrum of state measures that
17 have been enacted to combat this growing problem. Part II argues that a ban on fraudulent campaign
18 ads like California’s advances not only the government’s interest in protecting the integrity of
19 elections, but also its compelling informational interest in ensuring that voters have credible, useful
20 data on which they can “make informed choices” in elections. *Buckley v. Valeo*, 424 U.S. 1, 14-15
21 (1976) (per curiam). As the U.S. Supreme Court has repeatedly recognized, “The right of citizens
22 to inquire, to hear, to speak, and to use information to reach consensus is a precondition to
23 enlightened self-government and a necessary means to protect it.” *Citizens United v. FEC*, 558 U.S.
24

25

26 ³ CLC has also offered support for several federal measures seeking to regulate the use of AI in
27 election ads, such as the Protect Elections from Deceptive AI Act, S. 2770, 118th Cong. (2023); AI
28 Transparency in Elections Act of 2024, S. 3875, 118th Cong. (2024); Preparing Election
Administrators for AI Act, S. 3897, 118th Cong. (2024).

1 310, 339 (2010).

2 As this Court assesses the challenge to AB 2839, it should consider the many other
3 jurisdictions that have implemented similar restrictions on deepfakes and deceptive synthetic media
4 in the electoral context, and the shared concerns that animated them. That so many states have
5 already acted to restrict or regulate political deepfakes in the few years that such technology has
6 been widely available reinforces the critical need to protect our elections from AI-powered
7 deceptive messaging. While aspects of the Act may benefit from further refinement, the law has a
8 “plainly legitimate sweep,” *see Wash. State Grange v. Wash. State Republican Party*, 552 U.S. 442,
9 449 n.6 (2008), and plaintiffs provide no justification for the sweeping facial invalidation that they
10 demand.

11
12 For these reasons, CLC respectfully requests that the Court deny plaintiffs’ motion for
13 summary judgment and grant defendants’ motion for summary judgment with regard to AB 2839.

14 15 ARGUMENT

16 I. The challenged law targets a rapidly evolving threat to free and fair elections.

17 Like California, states across the country have recognized the harmful effects of political
18 deepfakes and taken steps to alleviate them. “That broadly shared judgment is entitled to respect.”
19 *Minnesota Voters All. v. Mansky*, 585 U.S. 1, 16 (2018). A survey of these emerging state laws—
20 and some of the episodes that animated them—confirms that California’s concerns about its
21 capacity to preserve free and fair elections in the face of this technological upheaval are well
22 founded.

23 24 A. Deepfakes and deceptive synthetic media pose novel risks in the electoral context.

25 Deceptive political advertising is not a new phenomenon. But the advent of AI poses a
26 particularly acute threat—especially in the electoral context—due to its unprecedented ability to
27 create realistic false content, as well as the ease with which it enables bad actors to produce media
28

1 that intentionally distorts reality to mislead voters.

2 With the ready availability of AI-powered tools, what once might have required a niche
 3 skill set or special software can now be accomplished with only a few clicks of a mouse.⁴ As a
 4 Minnesota district court recently observed, “the means of spreading false political speech today
 5 would be unrecognizable to the Americans of 20 years ago, let alone 200 years ago. . . . [R]apid
 6 advances in technology now allow individuals to spread false political speech much more easily
 7 and much more convincingly.” *Kohls v. Ellison*, No. 24-cv-3754-LMP/DLM, 2025 WL 66765, at
 8 *1 (D. Minn. Jan. 10, 2025).

9 The problem is one of global dimension. Election-related deepfakes, whether AI-generated
 10 or otherwise, are being used to spread mis- and disinformation in elections around the world, not
 11 just in the United States.⁵ These tools make it easier to “amplify” existing efforts to spread distrust
 12 in our electoral systems, institutions, and democratic governance.⁶ In its 2024 Global Risks Report,
 13 the World Economic Forum cited false information, including “imposter, manipulated, and
 14 fabricated content,” as one of the greatest risks to elections and democratic processes in countries
 15 around the world.⁷

22

23 ⁷ World Economic Forum, *The Global Risks Report 2024*, at 18-19, https://www3.weforum.org/docs/WEF_The_Global_Risks_Report_2024.pdf.

1 Publicly available generative AI tools have already been used in the U.S. to create
 2 deceptively realistic false content, including political deepfakes, to mislead the public regarding
 3 candidate positions and to spread disinformation about election processes. The 2024 election cycle
 4 is replete with examples illustrating the scale of this problem.⁸ In October 2024, fake voice clips
 5 purporting to be recordings of presidential candidates Donald J. Trump and Kamala Harris were so
 6 prevalent that the Washington Post published an interactive story seeking to teach voters how to
 7 distinguish fabricated audio from real, unmanipulated content.⁹

9 The most prominent example of a presidential deepfake in the 2024 cycle occurred shortly
 10 before the New Hampshire presidential primary, when thousands of voters received a robocall using
 11 what purported to be then-President and presidential candidate Joseph R. Biden's voice telling them
 12 not to vote in the presidential primary election.¹⁰ It was later revealed that Steve Kramer, a political
 13 consultant, had paid \$150 to have AI used to create the fake audio.¹¹ The scandal prompted the

15

16 ⁸ In an earlier episode that garnered significant media attention, a May 2019 video of
 17 Representative Nancy Pelosi had been "significantly slowed down" to make her appear drunk and
 18 slurring her words. It was circulated on social media, with one post on Facebook being shared
 19 91,000 times. Reuters Staff, *Fact check: "Drunk" Nancy Pelosi video is manipulated*, Reuters

fake Biden robocall, NBC News (Feb. 23, 2024), <https://www.nbcnews.com/politics/2024-election/biden-robocall-new-hampshire-strategist-rcna139760>. While voter suppression is illegal

1 New Hampshire legislature to introduce legislation addressing the issue of deceptive deepfakes of
 2 candidates created with AI, which was enacted in summer 2024.¹²

3 Recent events have also validated the concern that AI may provide foreign governments
 4 with new tools to sow division among American voters and undermine our process of self-
 5 governance. For example, during the 2024 election cycle, the GRU, Russia's military intelligence
 6 service, reportedly paid John Mark Dougan, the operator of several fake news websites, to produce
 7 viral deepfake videos and misinformation targeting Kamala Harris's campaign. These included a
 8 deepfake audio supposedly from Barack Obama suggesting that the Democrats had ordered the July
 9 assassination attempt against Donald Trump, and a viral hoax video in which an AI-generated
 10 persona claiming to be a former student of Vice-Presidential candidate Tim Walz accused Walz of
 11 abuse at the high school where he taught.¹³

12 While deepfakes and other deceptive synthetic media featuring federal candidates grab
 13 national attention, state and local candidates with fewer resources often struggle even more to

17 in New Hampshire and Mr. Kramer faces criminal charges for both voter suppression and
 18 impersonating a candidate, New Hampshire law did not prohibit Mr. Kramer from creating or
 19 distributing a deepfake to the public generally. *See* Shannon Bond, *A Political Consultant faces*
 20 *charges and fines for Biden deepfake robocalls*, NPR (May 23, 2024),
<https://www.npr.org/2024/05/23/nx-s1-4977582/fcc-ai-deepfake-robocall-biden-new-hampshire-political-operative>.

 24 664:14-c; H.B. 1596, Reg. Sess. (N.H. 2024), https://gc.nh.gov/bill_status/legacy/bs2016/billText.aspx?id=1392&txtFormat=html&sy=2024 (requires disclosure of deceptive AI used in political advertising); H.B. 1432, Reg. Sess. (N.H. 2024), https://gc.nh.gov/bill_status/legacy/bs2016/billText.aspx?id=1239&txtFormat=html&sy=2024 (no deepfakes “for the purpose of embarrassing, harassing, entrapping, defaming, extorting, or otherwise causing any financial or reputational harm to the identifiable person.”).

25 ¹³ Catherine Belton, *American creating deepfakes targeting Harris works with Russian intel, documents show*, Wash. Post (Oct. 23, 2024), <https://www.washingtonpost.com/world/2024/10/23/dougan-russian-disinformation-harris>.

1 address deepfakes and “get the word out” to their electorate about an ad’s inauthenticity.¹⁴ For
 2 example, Paul Vallas, a 2023 Chicago mayoral candidate, was the subject of a deceptive audio clip
 3 anonymously distributed online weeks before the election; this AI-generated ad depicted Vallas
 4 making a statement to the effect of “back in my day, cops would kill 17 or 18 people and ‘nobody
 5 would bat an eye.’” The video was viewed thousands of times before it was eventually deleted.¹⁵
 6 While many states have enacted laws that might have helped to address this issue, *see infra* note
 7 20, neither the state of Illinois nor the City of Chicago have yet enacted legislation to address
 8 election deepfakes.¹⁶

9
 10 In contrast, Indiana’s state law addressing digitally manipulated political ads had a clear
 11 impact in the 2024 gubernatorial race. In that race, then-Senator (now Governor) Mike Braun ran
 12 an ad depicting his opponent as “standing at a podium while her supporters hoist signs declaring
 13 ‘NO GAS STOVES!’”—an image that was digitally altered to show a message that never existed.¹⁷

1 Just a few months before, Indiana had enacted a law, *see* Ind. Code §§ 3-9-8-1 through 3-9-8-6,
 2 prohibiting “fabricated media” in campaign communications without a disclaimer. *Id.* In Indiana,
 3 fabricated media is a broad category, including media that “conveys a materially inaccurate
 4 depiction of the individual’s speech, appearance, or conduct” that has been altered without the
 5 individual’s consent, where a reasonable person would not be able to recognize that the recording
 6 had been altered. Ind. Code § 3-9-8-3(1). Braun’s ad did not include the required disclaimer; after
 7 the press began to inquire about the ad, it was pulled and replaced with a new version featuring the
 8 required disclaimer.¹⁸ Public pressure led to compliance with the law, and the campaign even touted
 9 this compliance as a positive, first-of-its-kind action in Indiana.¹⁹

10

11 **B. Jurisdictions nationwide have recognized the threat posed by political deepfakes and**
 12 **similar deceptive media—and, like California, have taken steps to safeguard their**
 13 **elections.**

14 Like California, New Hampshire, and Indiana, states across the country have recognized
 15 the danger posed by deepfakes and synthetic media in the electoral context, and a near majority
 16 have enacted legislation seeking to address deceptive depictions of candidates and election-related
 17 misinformation.

18 More than twenty other states have enacted statutes addressing the problem of deepfakes
 19 and other deceptive synthetic media portrayals of political candidates.²⁰ The laws typically take

 Elec. Code Ann. § 255.004; Utah Code Ann. § 20A-11-1104 (West 2024); Wash. Rev. Code

1 two forms: (1) prohibitions on the knowing distribution of deepfakes depicting candidates or other
 2 content closely related to elections and (2) on-ad disclaimers or other disclosure regarding the
 3 synthetic, deceptive, or manipulated nature of the content.²¹ Many limit the window for application
 4 of these prohibitions to the period immediately preceding the election at which the candidate or
 5 party is on the ballot.²² Others only regulate paid communications, or those made by candidates or
 6 political committees.²³ And still other states eschew direct regulation of these communications,
 7 instead providing candidates and other individuals depicted in deepfakes or synthetic media with
 8 the ability to seek an injunction or damages in court for false or inaccurate depictions of themselves,
 9 alongside a safe harbor for communications that include a disclaimer about the manipulated nature
 10 of the content.²⁴

12 At one end of the regulatory spectrum, for example, Minnesota's law prohibits the
 13
 14

15 §§ 42.62.020, 42.62.030; Wis. Stat. § 11.1303(2), (2m).

16 ²¹ *See, e.g.*, Minn. Stat. § 609.771, subd. 2 (prohibiting knowing dissemination of a nonconsensual
 17 deepfake depicting a candidate); Del. Code Ann. tit. 15, § 5145; Mich. Comp. Laws § 168.932f; N.M. Stat. Ann. § 1-19-26.8 (prohibiting dissemination unless the depiction includes a disclaimer); Fla. Stat. § 106.145; Utah Code Ann. § 20A-11-1104 (West 2024); Wis. Stat. § 11.1303(2), (2m) (requiring AI-generated content or synthetic media depicting a candidate to include a disclaimer).

19 ²² *See, e.g.*, Minn. Stat. § 609.771, subd. 2(a)(3) (prohibiting dissemination of a deepfake within
 20 ninety days of a political party's nominating convention or after the start of the absentee voting
 21 period for a presidential nominating primary, state or local primary, special, or general election); Mich. Comp. Laws § 168.932f(1)(b) (prohibiting distribution of "materially deceptive media" within ninety days of an election); Idaho Code §§ 67-6602(7)(a), 67-6628A (governing only
 22 communications that fall under the definition of electioneering communications, which are limited
 23 to the thirty days prior to a primary election and sixty days prior to a general election).

24 ²³ *See, e.g.*, Fla. Stat. § 106.145(2) (regulating only paid political advertisements and
 25 electioneering communications); Wis. Stat. § 11.1303(2), (2m) (regulating only paid express or
 26 issue advocacy communications by candidates, political parties, PACs, or other committees); Utah
 27 Code Ann. § 20A-11-1104(2)(a) (West 2024) (regulating only communications paid for by
 28 candidates, PACs, political issues committees, political parties, or other persons "using a
 contribution").

²⁴ *See, e.g.*, Idaho Code § 67-6628A; S.D. Codified Laws §§ 12-26-32 through 12-26-37 (effective July 1, 2025); Wash. Rev. Code §§ 42.62.020, 42.62.030.

1 dissemination of “deep fakes” within the absentee voting period and in the 90 days prior to a party’s
2 nominating convention. *See* Minn. Stat. § 609.771, subd. 2.²⁵ The statute defines “deep fake” as
3 “any video recording, motion-picture film, sound recording, electronic image, or photograph, or
4 any technological representation of speech or conduct substantially derivative thereof” that is “so
5 realistic that a reasonable person would believe it depicts speech or conduct of an individual who
6 did not in fact engage in such speech or conduct,” where the production of the representation was
7 “substantially dependent on technical means,” rather than based on another person’s ability to
8 impersonate the depicted individual via physical or verbal means. Minn. Stat. § 609.771, subd. 1(c).
9 Such content is only prohibited if it is created without the consent of a depicted individual and with
10 the intent to injure a candidate or influence an election’s result. *Id.* § 609.771, subd. 2(a).
11 Minnesota’s prohibition applies when a person disseminates a deepfake or enters a contract to
12 disseminate a deepfake, or if a person “knows or acts with reckless disregard” about whether
13 content they disseminate is a deepfake, excepting broadcasters that disseminate deepfake content
14 produced by a candidate where that dissemination is required by federal law. *Id.* § 609.771, subd.
15 2(b).

16 Michigan likewise prohibits the distribution of “materially deceptive media” if: the person
17 distributing the media knows that it “falsely represents a depicted individual,” Mich. Comp. Laws
18 § 168.932f(1)(a); the distribution occurs within 90 days before an election, *id.* § 168.932f(1)(b);
19 the distributor intends to “harm the reputation or electoral prospects of a candidate in an election,
20 and the distribution is reasonably likely to cause that result,” *id.* § 168.932f(1)(c); and the person
21 “intends the distribution to change the voting behavior of electors in an election by deceiving the

²⁵ Minnesota’s deepfake prohibition is currently under legal challenge from two of the plaintiffs in this case. *See Kohls v. Ellison*, No. 24-cv-3754-LMP/DLM (D. Minn.) and *X Corp. v. Ellison*, No. 25-cv-01649 (D. Minn.).

1 electors into incorrectly believing that the depicted individual in fact engaged in the speech or
2 conduct depicted, and the distribution is reasonably likely to cause that result,” *id.* § 168.932f(1)(d).
3 However, Michigan’s law also lifts that prohibition if the media includes a disclaimer stating that
4 “the [media] has been manipulated by technical means and depicts speech or conduct that did not
5 occur,” provided the disclaimer satisfies certain format requirements. *Id.* § 168.932f(2). Finally,
6 Michigan authorizes certain parties—*i.e.*, “the attorney general, a depicted individual, a candidate
7 for office who has been injured or is likely to be injured by the materially deceptive media, or any
8 organization that represents the interests of voters likely to be deceived by the materially deceptive
9 media,” *id.* § 168.932f(4)—to seek permanent injunctive relief against violators of the law. *See id.*
10 § 168.932f(4)-(9).

11 In states like North Dakota, Florida, and Wisconsin, by contrast, disclaimer requirements
12 provide the primary means of regulating synthetic election-related media. North Dakota’s recently
13 enacted law requires a disclaimer stating that content was “generated by artificial intelligence” on
14 any ad, communication, or other “action taken for a political purpose” containing images, graphics,
15 video, audio, text, or other digital content that “visually or audibly impersonate[s] a human” and
16 was created in whole or in part with artificial intelligence. 2025 N.D. Laws H.B. 1167 (enacted
17 Apr. 11, 2025; to be codified at N.D. Cent. Code Ann. § 16.1-10).

18 Florida likewise requires any political advertisement, electioneering communication, or
19 “miscellaneous advertisement of a political nature” that contains content created in whole or in part
20 by “generative artificial intelligence” to include a disclaimer. Fla. Stat. § 106.145. Like Florida,
21 Wisconsin has also enacted a disclaimer requirement and limited its application to certain paid
22 campaign communications containing synthetic media. *See* Wis. Stat. § 11.1303(2), (2m).

23 The remedies and enforcement mechanism set forth in state AI measures also differ. In
24 Washington state, candidates have the option to pursue injunctive relief and bring a civil action for
25

1 damages against the sponsor of electioneering communications that include deceptive “synthetic
 2 media” depictions of the candidate. Wash. Rev. Code § 42.62.020(2), (3). The statute creates an
 3 affirmative defense for any electioneering communication that includes a disclaimer stating “This
 4 (image/video/audio) has been manipulated,” provided the disclaimer is “in a size easily readable
 5 by the average viewer” and, as relevant, appears for the duration of video media or is read in a
 6 clearly spoken at the beginning and end of audio-only media (or at least every two minutes, for
 7 longer audio communications). Wash. Rev. Code § 42.62.020(4).

9 South Dakota recently enacted a law similar to Washington’s, that prohibits the
 10 dissemination of a deepfake²⁶ with the intent to injure a candidate; creates a personal cause of action
 11 for the individual or candidate depicted; and includes an affirmative defense where the content
 12 includes a disclaimer stating that “This (image/video/audio) has been manipulated or generated by
 13 artificial intelligence.” S.D. Codified Laws § 12-26-37 (effective July 1, 2025). Notably, South
 14 Dakota also includes a more expansive list of parties who may seek injunctive relief to stop the
 15 distribution of a deepfake, including the attorney general and “a candidate who is injured or likely
 16 to be injured by the dissemination of a deepfake,” rather than only the person depicted. S.D.
 17 Codified Laws § 12-26-35 (effective July 1, 2025).

19 As this brief survey illustrates, states have responded to the problem of political deepfakes
 20 in a range of ways, even as there is clearly widespread consensus about the gravity of the problem
 21 and the need for regulatory action. Further, as the technology continues to evolve, states must
 22 continue to update and refine their deepfake laws to address emerging challenges. For example,
 23 Texas was one of the first states to address the issue of deepfakes in 2019—prior to the widespread
 24

26 Deepfake is defined as “any image, audio recording, or video recording created or manipulated
 27 with the use of artificial intelligence or other digital technology that is so realistic, a reasonable
 28 person would believe it depicts the speech or conduct of an actual individual who did not in fact
 engage in the speech or conduct.” S.D. Codified Laws § 12-26-32 (effective July 1, 2025).

1 availability of generative AI tools.²⁷ Texas prohibited the creation and publication or distribution
 2 of a “deep fake video” (defined as “a video, created with the intent to deceive, that appears to depict
 3 a real person performing an action that did not occur in reality”) within thirty days of an election.
 4 Tex. Elec. Code Ann. § 255.004(d) and (e). Over the years, Texas legislators have continued to
 5 introduce bills on the topic, including multiple bills introduced in 2024 and in 2025.²⁸ The 2025
 6 bills—HB 366 and SB 893—have each been passed in their respective chambers and have crossed
 7 over, as of the time of writing this brief.²⁹

9 **II. The governmental interest in ensuring an informed electorate is well established and
 10 supports tailored regulation of deepfakes and similar deceptive media in elections.**

11 As the short history of deceptive synthetic media in U.S. elections demonstrates, AI-
 12 powered deepfakes and similar political advertising have the potential to sow voter confusion,
 13 facilitate the rampant spread of election-related misinformation, and undermine trust in the
 14 democratic process.

15 The state defendants argue that the laws are justified by California’s interest in protecting
 16 the integrity of its elections and preventing fraud. ECF No. 49-1 at 14-17. Amicus agrees. But these
 17 laws also advance the same important transparency interest that the Supreme Court has long
 18 recognized justifies campaign finance disclosure laws: to ensure voters can “make informed choices

21
 22 ²⁷ See Tex. Elec. Code Ann. § 255.004(d), (e). While § 255.004(b), which prohibited a person
 23 from “knowingly represent[ing] in a campaign communication that the communication emanates
 24 from a source other than its true source” “with intent to injure a candidate or influence the result of
 25 an election,” was declared unconstitutional in *Ex Parte Stafford*, No. PD-0310-23, 2024 WL
 26 4031614 (Tex. Crim. App. Sept. 4, 2024), the portions of the statute addressing deepfakes remain
 27 in effect.

28 ²⁸ See, e.g., H.B. 401, 89th Leg. (Tex. 2024); H.B. 556, 89th Leg. (Tex. 2024); S.B. 228, 89th
 29 Leg. (Tex. 2024).

27 ²⁹ See H.B. 366, 89th Leg. (Tex. 2025), available at <https://capitol.texas.gov/BillLookup/History.aspx?LegSess=89R&Bill=HB366>; S.B. 893, 89th Leg. (Tex. 2025), available at <https://capitol.texas.gov/BillLookup/History.aspx?LegSess=89R&Bill=SB893>.

1 among candidates for office.” *Buckley*, 424 U.S. at 14-15.

2 AB 2839 is a proportionate response to the magnitude of the problem and is justified by
3 important governmental interests. At a minimum, the law certainly does not warrant the “strong
4 medicine” of facial invalidation that plaintiffs seek. *United States v. Hansen*, 599 U.S. 762, 770
5 (2023). Limiting the dissemination of deliberately deceptive, harmful speech about state candidates
6 and elections officials during the critical pre-election period “protect[s] free and fair elections,”
7 Cal. Elec. Code § 20012(a)(4), and ensures that these powerful new technologies do not destabilize
8 citizens’ ability to cast informed and meaningful votes.

9

10 **A. The Supreme Court has long recognized that laws enabling citizens to cast informed
11 votes are crucial to a functioning democracy.**

12 To meaningfully participate in the democratic process, voters must be able to evaluate the
13 credibility and reliability of electoral messages and the underlying motivations of the people paying
14 for them. Plaintiffs focus only on their putative right to use AI to make misleading or satirical
15 depictions of various candidates, but they completely “ignore[] the competing First Amendment
16 interests of individual citizens seeking to make informed choices in the political marketplace.”
17 *McConnell v. FEC*, 540 U.S. 93, 197 (2003) (citation omitted), *overruled in part on other grounds*
18 by *Citizens United v. FEC*, 558 U.S. 310 (2010). As the Supreme Court explained in *Citizens*
19 *United*:

20 With the advent of the Internet, prompt disclosure of expenditures can provide
21 shareholders and citizens with the information needed to hold corporations and
22 elected officials accountable for their positions and supporters. . . . The First
23 Amendment protects political speech; and disclosure permits citizens and
24 shareholders to react to the speech of corporate entities in a proper way.
25 558 U.S. at 370-71 (citations and quotation marks omitted). So too do measures that shine a light
26 on AI-generated election advertising provide the public with critical information—*i.e.*, more
27 speech—about the campaign messages they see, and thereby promote the values and principles that
28 underlie the First Amendment. Indeed, “[t]here can be no question about the legitimacy of the

1 State's interest in fostering informed and educated expressions of the popular will in a general
 2 election." *Anderson v. Celebreeze*, 460 U.S. 780, 796 (1983).

3 The right to free speech was designed to enable self-government, ensure responsive
 4 officeholders, and prevent the corruption of democratic processes. *See Knox v. Serv. Emps. Int'l*
 5 *Union, Local 1000*, 567 U.S. 298, 308 (2012) ("Our cases have often noted the close connection
 6 between our Nation's commitment to self-government and the rights protected by the First
 7 Amendment."). Properly understood, disclosure laws, including the disclaimer provisions in AB
 9 2839, enhance, rather than constrain, the free speech necessary to sustain our democracy. "In a
 10 republic where the people are sovereign, the ability of the citizenry to make informed choices [in
 11 elections] is essential." *Buckley*, 424 U.S. at 14-15.

12 Indeed, the Ninth Circuit too has "repeatedly recognized an important (and even
 13 compelling) informational interest" in requiring transparency in campaign advertising. *Family PAC*
 14 *v. McKenna*, 685 F.3d 800, 806 (9th Cir. 2012). "Providing information to the electorate is vital to
 15 the efficient functioning of the marketplace of ideas, and thus to advancing the democratic
 16 objectives underlying the First Amendment." *Human Life of Wash., Inc. v. Brumsickle*, 624 F.3d
 17 990, 1005 (9th Cir. 2010); *see also Cal. Pro-Life Council, Inc. v. Getman*, 328 F.3d 1088, 1105
 18 (9th Cir. 2003) (noting that in the "cacophony of political communications through which
 19 California voters must pick out meaningful and accurate messages . . . being able to evaluate who
 20 is doing the talking is of great importance"). As precedents of both the Supreme Court and this
 21 Circuit have recognized, voters need full and accurate information about the campaign messages
 22 they see in order to meaningfully participate in the electoral process.

23 **B. The government's informational interest supports both a ban on fraudulent AI-
 24 generated election ads and disclaimer requirements.**

25 "[T]he people in our democracy are entrusted with the responsibility for judging and
 26 evaluating the relative merits of conflicting arguments." *First Nat'l Bank of Boston v. Bellotti*, 435

1 U.S. 765, 791 (1978). But the ability of AI to create an extremely convincing yet imperceptibly
2 false alternative reality poses a serious threat to the voting public's ability to properly "judge" and
3 "evaluate" political messages seeking to influence their voting decisions—a First Amendment
4 interest recognized by the Supreme Court.
5

6 Likewise, as the Supreme Court has also recognized, there is a "compelling interest in
7 protecting voters from confusion and undue influence." *Burson v. Freeman*, 504 U.S. 191, 199
8 (1992) (plurality opinion). Left unchecked, the proliferation of deepfakes and similarly deceptive
9 synthetic media in elections could facilitate a political landscape where electoral ads are
10 increasingly used for manipulation: to misrepresent who is speaking and what is being said.
11

12 The state's well-established interest in fostering an informed electorate thus supports
13 restrictions on the misuse of AI to create false or fraudulent campaign communications. A ban on
14 deceptive campaign ads like California's buttresses citizens' confidence that the persons
15 "speaking" on behalf of a candidate are authentic, not an AI fabrication, and allows voters to rely
16 on campaign ads in assessing candidates and ballot measures. A ban thus advances not only the
17 government's interest in protecting the integrity of elections, ECF No. 49-1 at 14-17, but also its
18 important informational interest in ensuring that voters have credible, useful information on which
19 they can base their voting decisions.
20

21 Without laws like California's, the use of generative AI in elections can interfere with
22 voters' ability to meaningfully evaluate the candidates vying to represent them, while also impeding
23 the ability of candidates and political parties to effectively communicate their messages to voters.
24 If voters are unable to trust that what they are seeing is authentic, then they could be easily misled
25 about a candidate's positions or actions, and might ultimately lose trust in the democratic process
26 that the First Amendment is meant to protect. *Burson*, 504 U.S. at 199 ("[T]he right to vote freely
27 for the candidate of one's choice is of the essence of a democratic society.") (internal quotation
28

1 marks omitted). And as citizens’ mistrust of the informational environment grows, it becomes
2 easier for “domestic or international actors . . . [to] deliberately try[] to sow chaos through
3 misinformation or disinformation” or “at minimum cause doubt and confusion.” Evan Chiacchiaro,
4 *Generative AI and Electoral Communications*, 9 Geo. L. Tech. Rev. 166, 181 (2025).
5

6 An AI disclaimer requirement similarly—and more directly—furthers the government’s
7 informational interest. A disclaimer puts voters on notice that the content they are seeing or hearing
8 was created or substantially altered using AI, allowing them to evaluate that content with the
9 requisite skepticism regarding the authenticity of what is being depicted. An AI disclaimer
10 requirement essentially requires an ad’s sponsors to “stand by” their use of AI, heightening the
11 public’s ability to decide for themselves whether the ad can be relied on to influence their
12 decisionmaking. In the absence of such regulation, voters will be denied vital information that could
13 help them evaluate whether what they are seeing and hearing in campaign ads is authentic and real,
14 which fundamentally threatens their ability to cast an informed vote and meaningfully participate
15 in our democracy.

16 Although plaintiffs argue that the disclaimer requirement unconstitutionally “compels”
17 speech, ECF No. 45-1 at 19-22, no court has so viewed an informational disclaimer requirement
18 for electoral ads, nor applied strict scrutiny on this basis. Indeed, the Ninth Circuit recently rejected
19 a similar argument in *No on E v. Chiu*, and upheld a disclaimer requirement that would have
20 required the plaintiff group to devote 35% of a printed campaign ad to information about the ad’s
21 sponsor and top donors. 85 F.4th 493, 507 (9th Cir. 2023), *cert. denied sub nom. No on E, San*
22
23
24
25
26
27
28

1 *Franciscans v. Chiu*, No. 23-926, 2024 WL 4426534 (U.S. Oct. 7, 2024).³⁰ As other Circuits have
2 found, the “election-related context implicated here is alone sufficient to distinguish” a campaign
3 ad disclaimer from instances of unconstitutional compelled speech. *Gaspee Project v. Mederos*, 13
4 F.4th 79, 95 (1st Cir. 2021) (rejecting an “attempt to analogize” Rhode Island’s top-five contributor
5 disclaimer requirement to the compelled speech regulations that have elicited strict scrutiny), *cert. denied*, 142 S. Ct. 2647 (2022). So too should the Court here reject plaintiffs’ attempt to heighten
6 the exacting scrutiny that applies to electoral disclaimer requirements, *see Ams. for Prosperity*
7 *Found. v. Bonta*, 594 U.S. 595, 615 (2021), and affirm, as the Ninth Circuit has, that California’s
8 disclaimer requirement “allows citizens to make informed choices in the political marketplace.” *No*
9 *on E*, 85 F.4th at 505.

22

23

24

25

³⁰ Insofar as specific elements of the disclaimer—such as the font size, Cal. Elec. Code § 20012(b)(2)(B)(i)—are deemed burdensome, this court can construe the law to allow a disclaimer of no more than a designated percentage of the ad. *See, e.g., Yes on Prop B v. City & Cnty. of S.F.*, 440 F. Supp. 3d 1049, 1055 (N.D. Cal.) (limiting application of San Francisco’s top donor disclaimer to no more than 40% of advertisement).

CONCLUSION

For the foregoing reasons, amicus respectfully requests that the Court deny plaintiffs' motion for summary judgment and grant defendants' motion for summary judgment with regard to AB 2839.

Dated: June 6, 2025

Respectfully submitted,
